2021 Supplier Diversity Study Results

April 2021
“Supplier diversity needs to be important to everyone, not just the supplier diversity department.”

-US automobile company
The Hackett Group surveyed over 100 large global and US-based companies regarding their supplier diversity programs and strategies across a variety of industries including healthcare, financial and consumer industries. Average company revenue was $7B generated in the US and $11.8B globally.

**INDUSTRIES**

- Healthcare: 23%
- Financials: 19%
- Consumer discretionary: 16%
- Information technology: 11%
- Energy: 10%
- Materials: 9%
- Consumer staples: 7%
- Industrials: 6%
- Telecom services: 1%

**COMPANY SIZE**

- **Global revenue**
  - Bottom quartile: $4.1B
  - Median: $11.8B
  - Top quartile: $45.2B

- **US-only revenue**
  - Bottom quartile: $3.0B
  - Median: $7.0B
  - Top quartile: $15.9B
Study overview

In response to increasingly visible social and economic factors, supplier diversity has become a critical business function that procurement organizations must design, support and drive to success. In many cases, supplier diversity has even become a board-level topic, significantly impacting its prioritization and program funding as well as compelling more companies to pursue global program expansions.

**SUPPLIER DIVERSITY PROGRAMS MAKE A BIG IMPACT**
- **$72M** Spend with diverse-owned business per US$ billion of total US spend
- **8%** Median 2021 spend goal for diversity spend as a percentage of total spend

**ENTERPRISE SUPPORT AND ALIGNMENT ARE CRITICAL**
- **#1** Supporting diversity and social responsibility corporate culture is the top objective for supplier diversity programs
- **92%** Percentage of organizations that allocate funds toward supplier diversity

**SUPPLIER DIVERSITY PROGRAMS ARE GROWING**
- **77%** Percentage of organizations planning an increase in spend with black-owned businesses
- **83%** Percentage of organizations that already have or plan to dedicate funds for supplier development activities

**SUPPLIER DIVERSITY IS A GLOBAL INITIATIVE**
- **69%** Percentage of organizations that have a global supplier diversity program or are planning to expand globally by 2023
- **#1** Woman-owned businesses are the top diverse category in all regions
Study objectives
• Identify the critical enterprise objectives that supplier diversity programs support and the key elements of successful program design.
• Understand how program activity is evolving in response to recent social reforms, regulatory change, market dynamics, etc.
• Understand how organizations are measuring the ROI of their supplier diversity programs.
• Gain insight into how organizations are developing and investing in diverse suppliers
• Understand the globalization of supplier diversity programs and how program scope is defined across different regions.

Supplier diversity defined:
Diverse suppliers include minority and women-owned businesses, veteran-owned, LGBTQ-owned, etc. Spend with small and medium businesses that do not also qualify for one of the other established diversity groups is not included unless otherwise specified.
Importance of supplier diversity objectives

Compliance with regulatory requirements remain the top objective, but strategic benefits are growing in importance. In fact, 99% of organizations consider supporting the corporate culture around diversity and inclusion to be an important objective. Notably, attracting and retaining talent jumped 11% as a very important objective when compared to The Hackett Group’s 2019 Supplier Diversity Study.

Please identify the importance that your organization places on each of the following supplier diversity objectives.
Social reform impact

Calls for social reform were widespread around the world (and particularly within the US) in 2020. Companies are seeing direct calls to action from consumers and employees to invest in areas of environmental, social and corporate governance (ESG). It is important for supplier diversity organizations to collaborate and coordinate on program strategies to ensure adequate alignment of goals and resources.

CHANGES TO SUPPLIER DIVERSITY PROGRAMS ARISING FROM 2020’S SOCIAL REFORM MOVEMENT

- Focus on improving internal culture on diversity and inclusion: 73%
- Increased C-level/board-level focus on supplier diversity: 73%
- Focus on spending with specific diversity groups: 53%
- Formal reporting of program activity internally and externally: 45%
- First-time formal goal setting for diverse supplier spend: 28%
- Pledge from budget owners towards supplier diversity: 27%
- Funds allocated specifically for technology to support program: 24%
- Funds allocated specifically for supplier development: 21%

Q Indicate which supplier diversity program activities have been initiated or altered as a result of social reform and racial inequality activities that occurred in 2020.
Increase in program spend

Diverse spend programs are overwhelmingly expected to increase over the next five years. The largest spend increase is expected with black-owned businesses, amid a tense social and political climate in the US around race and equity. Moderate increases are also expected across the board among and more so among woman-owned, minority-owned and LGBTQ-owned businesses.

Q
Indicate whether the focus of your company’s supplier diversity program is expected to shift more or less to any one group in the next 5 years.

* Other: A significant number of respondents cited plans to significantly increase spend with businesses owned by persons with disabilities.
Diverse spend as a percentage of total procurement spend is the most common metric reported on for supplier diversity programs. While many organizations currently have an average of 7.2% diversity spend, the targets for this metric are often well above 10% of total spend and even more so when looking out a few years. High spend targets are an encouraging statistic for program objectives and diverse-owned businesses, indicating high growth for years to come.

Q: What goals has your organization established for diversity spend as a percentage of total spend?
In order to grow supplier diversity programs, financial investment is necessary. The median annual program investment for supplier diversity is $100K, allowing diversity programs to fund activities like reporting, marketing and membership to supplier diversity programs. Investments are expected to grow as companies increase use of external resources, third-party enrichment services, supplier discovery tools, and more to drive program efforts.

**ANNUAL PROGRAM INVESTMENT***

- $30K: Bottom quartile
- $100K: Median
- $200K: Top quartile

**SUPPLIER DIVERSITY INVESTMENT PLANS**

- Increased granularity in diversity spend reporting: 59%
- Internal or external marketing/branding initiatives: 50%
- Educating business partners on contracts out of procurement scope: 50%
- Extending memberships to additional supplier diversity organizations: 47%
- Increased frequency of existing third-party data enrichment/reporting: 34%
- Investments in dedicate FTEs to support supplier diversity program: 31%
- Supplier discovery software tools: 30%
- First-time investment in third-party data enrichment/reporting: 23%
- First-time membership to any supplier diversity industry organization: 19%
- None of the above: 4%

* Includes external training, supplier development, trade shows, advertising, memberships, promotions, etc.

Which investments are planned by your organization this year to advance program activity?
Global structure

One-third of survey respondents have a US-based program and are planning to expand the supplier diversity program globally in the next 2-3 years, a significant shift in the scope and prioritization of ESG activities. But, many struggle with how to expand the program and understanding where to start and how to do it.

**GLOBAL SCOPE OF SUPPLIER DIVERSITY PROGRAMS**

<table>

</table>

Please select the response that best describes the global scope of your organization’s supplier diversity program.
Geographical expansion

Among supplier diversity organizations that plan to expand globally in the next few years, Canada, U.K. and western Europe are the most common targets for the next stage of expansion.

Working with third-party certification organizations like WEConnect International, NMSDC and WBENC was cited as the most important factor when deciding to expand globally.

Please indicate the specific countries or regions that are planned to be part of your supplier diversity program scope in 2-3 years.
Select the diversity groups that are part of the scope of your supplier diversity program for each region.

**Geographical scope**

**North America**
- Women-owned: 73%
- Veteran/service-disabled: 71%
- Race/ethnic-based: 70%
- LGBTQ: 68%
- Small business: 60%
- Aboriginal: 35%
- Local business: 30%
- Urban/rural: 30%

**Latin America**
- Women-owned: 24%
- Race/ethnic-based: 11%
- Small business: 9%
- LGBTQ: 6%
- Local business: 6%
- Aboriginal: 2%
- Veteran/service-disabled: 1%

**Western Europe**
- Women-owned: 30%
- Race/ethnic-based: 17%
- Small business: 15%
- LGBTQ: 10%
- Local business: 6%
- Veteran/service-disabled: 3%
- Aboriginal: 2%
- Urban/rural: 2%

**Eastern Europe**
- Women-owned: 24%
- Race/ethnic-based: 14%
- Small business: 10%
- LGBTQ: 8%
- Local business: 5%
- Aboriginal: 1%

**Asia**
- Women-owned: 26%
- Small business: 12%
- Race/ethnic-based: 9%
- LGBTQ: 8%
- Local business: 6%
- Veteran/service-disabled: 2%
- Aboriginal: 2%

**Africa**
- Women-owned: 18%
- Race/ethnic-based: 12%
- Small business: 10%
- LGBTQ: 7%
- Local business: 6%
- Urban/rural: 1%
- Veteran/service-disabled: 1%
- Aboriginal: 1%

**Australia, Oceania**
- Women-owned: 21%
- Aboriginal: 11%
- Small business: 8%
- Race/ethnic-based: 7%
- LGBTQ: 7%
- Local business: 5%
- Veteran/service-disabled: 2%
- Urban/rural: 1%

Understanding which diverse categories to target initially is important. Women-owned businesses are most frequently included in supplier diversity plans, but only by a small margin in the US; the margin is larger in other areas of the world.

Outside the US, the focus is primarily on women-owned, race-based and small businesses. In Australia, high importance is placed on spend with aboriginal-owned businesses relative to other categories.
Women-owned businesses make up nearly one-third of US-based supplier diversity programs. Minority-owned businesses also make up a large percentage of spend, with black-owned business being the most common. In prior years, data at this level of detail has been hard to come by. The increase in companies that are now able to report spend at the category level is a signal that supplier diversity programs are growing.

</tbody>
</table>

*Other: Primarily includes general minority-owned, veteran-owned and small businesses.
Eighty-nine percent of organizations capture some or all diverse spend at the diverse group level (e.g., women-owned, black-owned). However, 57% of supplier diversity programs do not require a valid and current certificate verifying diversity status, i.e., self-certification is accepted for suppliers. This presents a significant area of opportunity for diversity programs to increase spend-data integrity.

**ABILITY TO REPORT ON SPEND BY SPECIFIC DIVERSITY GROUP**

- We are able to capture all or most diverse spend at diverse group level: 67%
- We capture some but not all diverse spend at diverse group level: 22%
- Not currently doing but plan to enable this year: 8%
- Not currently doing but plan to enable in 2-3 years: 2%
- Not currently planning on reporting at diversity group level: 1%

**METHOD OF DIVERSE SUPPLIER VALIDATION**

- Only suppliers with a valid and current certificate verifying diversity status: 43%
- Suppliers classified as diverse with or without an accompanying certificate (i.e., self-reported or via a third-party data provider): 57%
Developing diverse suppliers

Diverse supplier development is an often overlooked and poorly funded component of supplier diversity. Currently, only 44% of supplier diversity programs have dedicated funds for supplier development, although 39% are planning to commit funds to this area to invest in valuable suppliers and, ultimately, improve the quality and performance of diverse suppliers.

Funds for Supplier Development Activities

- **44%** Yes, we allocate funds to supplier development activities
- **39%** No, but plan to
- **17%** No, we do not allocate funds to supplier development activities

Q: Has your organization allocated funds specifically for supplier development activities? If yes, how much?
Supplier development activities

The approach to diverse supplier development can come in a variety of forms, depending on the preferences and resources of each procurement organization. Clearly established goals and expanded use of suppliers from underutilized categories are most common, but areas like mentorship, training and other support areas can be particularly impactful.

SUPPLIER DEVELOPMENT ACTIVITIES THAT ARE MOST EFFECTIVE

- Clearly established development objectives and goals: 94%
- Expand use of diverse suppliers in underutilized categories: 88%
- Networking events for diverse suppliers: 85%
- Education/training resources: 84%
- Formal mentoring programs: 75%
- Assist diverse suppliers to increase their business capacity: 65%
- Partnering programs between diverse and established suppliers: 57%
- Joint teams with diverse suppliers: 46%
- Financial investment in supplier business: 41%
- Provide technical assistance: 40%
- Diversity scholarships: 39%
- Investment of technology or intellectual property: 32%
- Formal joint ventures: 29%
- Mergers & acquisitions: 23%

Select the degree of effectiveness for each activity.
Key takeaways

Starting, growing or improving an established supplier diversity program is top of mind for many procurement programs around the world. While developing the program, it is important to set the right scope for program activity and ensure it has an adequate level of support. These are seven areas in which to consider for your supplier diversity program:

- Ensure enterprise alignment by collaboration or coordination with enterprise environmental, social and corporate governance (ESG) activities and strategies.
- Invest in the supplier diversity program both with a budget and dedicated headcount.
- Join supplier diversity organizations for access to diverse supplier certifications, exposure to new suppliers and other areas of support, particularly when entering new geographies.
- Invest in the development of diverse suppliers with activities like performance management, supplier mentorship and training. Securing budget specific to supplier development is also important.
- Ensure high-quality data and reporting are used to measure program performance. Diverse spend should be captured for each category (e.g., women-owned, black-owned).
- Measure program ROI by going beyond diverse spend totals and capturing metrics like brand enhancement, economic impact and supplier innovation.
- Create policies to encourage the success of the supplier diversity program, like mandating inclusion of at least one diverse supplier in every sourcing event or tying compensation to program performance.
